PROFESSIONAL SUMMARY

Senior Software Engineer & Mobile Technical Lead with 6+ years of professional experience architecting, building, and scaling secure native iOS applications, reusable SDK layers, and connected hardware integrations. Expert in Swift, SwiftUI, UIKit, modular MVVM architecture, and multi-threaded concurrency environments. Proven track record of leading technical squads, ensuring rigorous test coverage via XCTest, optimizing performance via Xcode Instruments, and delivering robust software for health-tech and consumer platforms.

TECHNICAL SKILLS

- **Core iOS Technologies:** Swift, SwiftUI, UIKit, SDK Layer & Framework Development, Modular Architecture, Auto Layout, Core Data, URLSession, StoreKit / In-App Purchases, Localization
- **Hardware & Connected Devices:** Bluetooth Low Energy (BLE / CoreBluetooth), GATT Service Discovery, Real-Time Data Streaming, Background Execution, Device Synchronization
- **API Protocols & Networking:** RESTful APIs, GraphQL, WebSockets, Socket.IO, JSON Parsing, Network Caching, Resilience & Recovery
- **Concurrency & Performance:** Swift Concurrency, Async/Await, Actors, Actor Isolation, @MainActor, Sendable, Structured Concurrency, Combine, GCD, Xcode Instruments (Time Profiler, Allocations, Leaks)
- **Architecture & Leadership:** MVVM, VIPER, Clean Architecture, SOLID Principles, System Design, Technical Mentorship, Rigorous Code Reviews, Agile / Scrum
- **Testing, Reliability & Monitoring:** XCTest, Unit & UI Testing, Test-Driven Development, Firebase Crashlytics, Crash Triage, Incident Response, Performance Monitoring
- **DevOps & CI/CD:** CI/CD Pipelines, Fastlane, GitHub Actions, Xcode, Swift Package Manager, CocoaPods, App Store Connect, TestFlight, Release Management, Git

PROFESSIONAL DEVELOPMENT

- **Connected Hardware & SDK Architecture** – Advanced BLE Integration, Framework Design & Multi-Threaded Concurrency
- **Agile & Software Engineering Best Practices** – Technical Leadership, Quality Assurance & CI/CD Automation
- **AI-Assisted Engineering Systems** – Agentic Workflows, MCP Server Integration & Context Engineering

PROFESSIONAL EXPERIENCE

Senior Software Engineer (iOS Lead) Jan 2024 – Present
Fancall Private Limited | Ahmedabad, India

- Direct technical mobile architecture and lead a cross-functional squad of 13 engineers, driving sprint planning, solution design, technical documentation, and code quality standards.
- Architected and shipped scalable consumer-facing iOS applications and modular components using Swift, SwiftUI, and modular MVVM architecture, scaling to 350K+ downloads.
- Built high-throughput networking layers and handled multi-threaded asynchronous data flows using Swift Concurrency and Combine to ensure data-race safety.
- Profiled memory footprints and runtime behaviors with Xcode Instruments to eliminate performance bottlenecks, cutting crash rates and ensuring high application stability.
- Automated CI/CD release pipelines using Fastlane and GitHub Actions, establishing continuous build verification, unit testing stages, and seamless TestFlight/App Store deployments.
- Mentored engineers, conducted thorough architectural code reviews, and championed robust unit testing standards using XCTest.

Mobile Application Developer (iOS / AI) June 2023 – Jan 2024
Safe Pro AI Video Research Labs Pvt Ltd | Bengaluru, India

- Developed high-reliability iOS modules and reusable SDK components consuming enterprise REST APIs and real-time on-device Core ML models for rapid inference.
- Established unit testing standards (XCTest) within the CI/CD pipeline and authored technical architecture and design documentation to guide team onboarding.

Mobile Developer (iOS)

Feb 2023 – June 2023

DRC Systems | Gandhinagar, India

- Architected and deployed the **MeyDan MarketPlace** e-commerce iOS application end-to-end within 4 months using Swift, UIKit, and clean architectural patterns.
- Engineered secure cart checkout flows, dynamic product catalogs, and order tracking via RESTful API integrations in multi-threaded environments.
- Executed continuous deployment cycles (CI/CD) and managed App Store submission packages in alignment with Apple guidelines.

Mobile Engineer (iOS)

Jan 2022 – Feb 2023

Hyperlink InfoSystem | Ahmedabad, India

- Developed and shipped production apps including **BagZag** (Social Marketplace), Kloto, and Grupem, integrating secure backend services and modular features.
- Implemented order lifecycle and tracking systems (WISMO), location monitoring, and interactive feed modules adhering to Clean Architecture standards.

Mobile Developer (iOS), Intern to Full-Time

Jan 2021 – Dec 2021

Om Tec Web India | Ahmedabad, India

- Built native iOS features and backend communication layers for on-demand logistics and driver platforms (Sarve me Driver, Pudo Fast, Blookd).
- Refactored legacy codebases to modern Swift design patterns, improving maintainability, responsiveness, and application stability.

FEATURED PROJECTS

- **Fancall (Real-Time Communication Platform):** Native iOS real-time app featuring live streaming, modular SDK components, background data synchronization, and automated Fastlane release pipelines.
- **egun.in (BLE Connected Hardware App):** Engineered custom Bluetooth Low Energy (CoreBluetooth) hardware integration, GATT service discovery, device pairing resilience, and zero-latency packet parsing.
- **E-Commerce & Marketplaces (MeyDan, BagZag):** Production consumer apps featuring dynamic catalogs, cart checkout, and post-purchase order tracking workflows.
- **FaceSense (AI Facial Recognition App):** Built on-device AI vision app using Core ML for automated identity verification on hardware-constrained devices.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Engineering

2018 – 2022

Parul University | Vadodara, India
