PROFESSIONAL SUMMARY

Senior Software Engineer & iOS Technical Lead with 5+ years of experience architecting, building, and scaling high-performance native iOS applications. Expert in Swift, SwiftUI, UIKit, Combine, Async/Await, and Modular Architecture. Proven track record leading cross-functional engineering teams and automating CI/CD release pipelines with Fastlane and GitHub Actions. Designed the multi-agent AI development platform now used as the standard delivery path across the team's eight production repositories.

TECHNICAL SKILLS

- **Core iOS Technologies:** Swift, SwiftUI, UIKit, Modular Architecture, Auto Layout, Core Data, AVFoundation, Core ML, URLSession, StoreKit / In-App Purchases, Accessibility (VoiceOver, Dynamic Type), Localization
- **Concurrency & Performance:** Swift Concurrency, Async/Await, Actors, Actor Isolation, @MainActor, Sendable, Structured Concurrency, Task Groups, AsyncSequence, Continuations, Combine, Grand Central Dispatch (GCD), Data-Race Safety, Thread Safety, Xcode Instruments, Memory & Performance Profiling
- **Architecture & Leadership:** Technical Team Leadership, System Design, MVVM, VIPER, SOLID Principles, Code Reviews, Mentorship, Agile / Scrum
- **Testing & Quality:** XCTest, Unit & UI Testing, Test-Driven Development, Firebase Crashlytics, Crash Triage, Code Review
- **DevOps & CI/CD:** CI/CD Pipelines, Fastlane, GitHub Actions, Xcode, Swift Package Manager, CocoaPods, Code Signing & Provisioning Profiles, App Store Connect, TestFlight, Release Management, Git
- **AI Engineering & Agentic Workflows:** Claude Code, Model Context Protocol (MCP) Server Integration, Multi-Agent Orchestration, Subagent & Skill Design, Agent Memory Design, Context Engineering, AI-Assisted Code Review & Security Auditing
- **Integrations:** Bluetooth Low Energy (BLE / CoreBluetooth), Agora SDK, Socket.IO, REST APIs, APNs, Firebase Cloud Messaging (FCM), Cashfree Payment Gateway

PROFESSIONAL EXPERIENCE

Senior Software Engineer (iOS Lead) Jan 2024 – Present
Fancall Private Limited | Ahmedabad, India

- Direct technical architecture and lead a cross-functional team of 13 engineers across iOS, Android, and Backend domains, driving sprint planning, code reviews, and delivery execution.
- Architected and shipped native iOS streaming applications using Swift, SwiftUI, and MVVM modular architecture, scaling to 350K+ downloads with a 4.3-star store rating.
- Profiled memory and network behaviour with Xcode Instruments to eliminate the bottlenecks behind failed call connections, cutting crash rates and doubling call-connection success rate.
- Automated CI/CD release pipelines using Fastlane and GitHub Actions, establishing continuous build verification and seamless TestFlight/App Store deployments.
- Designed and operate an in-house AI development platform — 17 role-scoped agents and 11 custom skills wired to 12 MCP servers — now the standard delivery path across the team's 8 production repositories spanning iOS, Android, Backend, and Web.
- Authored the engineering policy layer governing AI-assisted development — protected-branch rules, explicit per-action commit approval, and required QA and security-audit stages — so changes are reviewed and build-verified before reaching a release branch.

Mobile Application Developer (iOS / AI) June 2023 – Jan 2024
Safe Pro AI Video Research Labs Pvt Ltd | Bengaluru, India

- Engineered on-device facial recognition workflows using Core ML models integrated with mobile hardware interfaces for rapid inference and attendance automation.
- Established unit testing frameworks (XCTest) within the CI/CD pipeline and authored technical architecture documentation to streamline developer onboarding.

Mobile Developer (iOS)

Feb 2023 – June 2023

DRC Systems | Gandhinagar, India

- Architected and deployed the MeyDan MarketPlace e-commerce app end-to-end within 4 months utilizing RESTful API parsers and reactive state management.
- Executed continuous deployment cycles (CI/CD) and structured metadata submission packages for public App Store releases.

Mobile Engineer (iOS)

Jan 2022 – Feb 2023

Hyperlink InfoSystem | Ahmedabad, India

- Developed and published multiple production iOS apps (BagZag, Kloto, Grupem, Prep-It), integrating real-time messaging, location-based logistics tracking, and enterprise REST APIs.
- Engineered scalable social e-commerce feeds and interactive test preparation engines adhering to clean architecture standards.

Mobile Developer (iOS), Intern to Full-Time

Jan 2021 – Dec 2021

Om Tec Web India | Ahmedabad, India

- Built native iOS features and backend communication layers for on-demand logistics and driver platforms (Sarve me Driver, Pudo Fast, Blookd).
- Refactored legacy codebases to modern Swift design patterns, improving code maintainability and overall application stability.

FEATURED PROJECTS

- **Fancall (Live Communication Platform):** Native iOS real-time audio/video calling app — Agora SDK session and group-room management, a Socket.IO event layer, in-app wallet backed by the Cashfree payment gateway, APNs push delivery, and a Swift Concurrency networking layer, released to TestFlight and the App Store through an automated Fastlane and GitHub Actions pipeline.
- **Fancall Brain (AI Agent Orchestration Platform):** Control plane for an AI-assisted development pipeline — role-scoped agents per domain, MCP server integration for cross-repository dispatch, per-project agent memory, and reusable skills for branch creation, code review, security scanning, and release checks. Codifies a repeatable task pipeline: triage → branch → plan → implement → QA review → security audit → build verification.
- **egun.in (BLE Smart Application):** Engineered custom Bluetooth Low Energy (CoreBluetooth) hardware integration, GATT service discovery, and low-latency data packet parsing.
- **FaceSense (AI Facial Recognition App):** Built on-device AI vision app using Core ML for automated identity verification on hardware-constrained devices.
- **Published App Store Portfolio:** Eight further shipped iOS applications beyond Fancall — BagZag (social marketplace), Kloto, Grupem, Prep-It, MeyDan MarketPlace, PUDO FAST, Sarve me Driver, and Blookd — spanning social e-commerce feeds, real-time chat, location-based logistics and delivery tracking, interactive test-preparation engines, and REST API integrations.

PROFESSIONAL DEVELOPMENT

- **iOS & Swift Application Development** – Advanced Architecture & Performance Optimization
- **Agile & Software Engineering Best Practices** – Technical Team Leadership & CI/CD Pipeline Automation
- **AI-Assisted Engineering Systems** – Agent Design, MCP Server Integration & Context Engineering

EDUCATION

Bachelor of Technology (B.Tech) in Computer Engineering

2018 – 2022

Parul University | Vadodara, India
