PROFESSIONAL SUMMARY

Senior Software Engineer & iOS Technical Lead with 5+ years of experience architecting, building, and scaling high-performance native iOS applications. Proficient in Swift, UIKit, SwiftUI, and modular MVVM architecture, with deep hands-on expertise integrating GraphQL and RESTful APIs. Demonstrated track record in building consumer-grade marketplace features, 1:1 real-time messaging, and post-purchase order tracking workflows, while automating CI/CD release pipelines and leading Agile engineering teams.

TECHNICAL SKILLS

- Core iOS Technologies:** Swift, UIKit, SwiftUI, Modular Architecture, Auto Layout, Core Data, URLSession, StoreKit / In-App Purchases, Accessibility (VoiceOver, Dynamic Type), Localization
- API Protocols & Networking:** GraphQL, RESTful APIs, WebSockets, Socket.IO, JSON Parsing, Network Caching, Offline Sync & Resilience
- Concurrency & Performance:** Swift Concurrency, Async/Await, Actors, Actor Isolation, @MainActor, Sendable, Structured Concurrency, Combine, GCD, Data-Race Safety, Thread Safety, Xcode Instruments (Time Profiler, Allocations, Leaks)
- Architecture & Leadership:** MVVM, VIPER, SOLID Principles, System Design, Component Design, Code Reviews, Mentorship, Agile / Scrum
- Testing, Reliability & Monitoring:** XCTest, Unit & UI Testing, Test-Driven Development, Firebase Crashlytics, Crash Triage, Incident Response, Performance Monitoring
- DevOps & CI/CD:** CI/CD Pipelines, Fastlane, GitHub Actions, Xcode, Swift Package Manager, CocoaPods, Code Signing & Provisioning Profiles, App Store Connect, TestFlight, Release Management, Git
- Integrations & Hardware:** APNs, Cashfree Payment Gateway, Bluetooth Low Energy (BLE / CoreBluetooth), Agora SDK, Core ML

PROFESSIONAL EXPERIENCE

Senior Software Engineer (iOS Lead) Jan 2024 – Present
Fancall Private Limited | Ahmedabad, India

- Direct technical mobile architecture and lead a cross-functional team of 13 engineers across iOS, Android, and Backend, driving sprint execution, system design breakdowns, and code quality.
- Architected and shipped consumer-facing iOS applications using Swift, UIKit, SwiftUI, and modular MVVM architecture, scaling to 350K+ downloads with a 4.3-star store rating.
- Built high-throughput networking layers consuming GraphQL and RESTful endpoints, alongside Socket.IO for real-time 1:1 user messaging, chat inboxes, and dynamic notifications.
- Profiled memory footprints and network lifecycles with Xcode Instruments to eliminate production bottlenecks, cutting crash rates and doubling call-connection success rates.
- Automated CI/CD release pipelines using Fastlane and GitHub Actions, establishing continuous build verification, testing stages, and seamless TestFlight/App Store deployments.
- Designed an in-house engineering automation layer with role-scoped AI agents to streamline PR reviews, automated test generation, and release audits across 8 production repositories.

Mobile Application Developer (iOS / AI) June 2023 – Jan 2024
Safe Pro AI Video Research Labs Pvt Ltd | Bengaluru, India

- Developed high-reliability iOS modules consuming enterprise REST APIs and real-time on-device Core ML models for rapid inference and attendance automation.
- Established unit testing standards (XCTest) within the CI/CD pipeline and authored technical architecture documentation to guide team onboarding and component design.

Mobile Developer (iOS) Feb 2023 – June 2023
DRC Systems | Gandhinagar, India

- Architected and deployed the **MeyDan MarketPlace** e-commerce iOS application end-to-end within 4 months using Swift, UIKit, and reactive state management.
- Engineered post-purchase buying tables, dynamic product catalog browsing, secure cart checkout flows, and order tracking via RESTful API integrations.

- Executed continuous deployment cycles (CI/CD) and managed application submission packages for public App Store release.

Mobile Engineer (iOS)

Jan 2022 – Feb 2023

Hyperlink InfoSystem | Ahmedabad, India

- Developed and shipped production iOS apps including **BagZag** (Social Marketplace), Kloto, and Grupem, integrating real-time 1:1 messaging and enterprise REST APIs.
- Implemented order lifecycle and tracking systems (WISMO), location-based delivery monitoring, and interactive feed modules adhering to Clean Architecture standards.

Mobile Developer (iOS), Intern to Full-Time

Jan 2021 – Dec 2021

Om Tec Web India | Ahmedabad, India

- Built native iOS features and backend communication layers for on-demand logistics and driver platforms (Sarve me Driver, Pudo Fast, Blookd).
- Refactored legacy codebases to modern Swift design patterns, improving code maintainability, responsiveness, and application stability.

FEATURED PROJECTS

- **Fancall (Live Platform & 1:1 Messaging):** Native iOS real-time communication app featuring live audio/video streaming, 1:1 chat inbox, dynamic wallet payments, APNs push delivery, and automated Fastlane release pipelines.
- **E-Commerce & Marketplaces (MeyDan, BagZag):** Production iOS consumer applications featuring dynamic item catalogs, cart checkout, buyer/seller messaging, and post-purchase order tracking.
- **egun.in (BLE Smart Application):** Engineered custom Bluetooth Low Energy (CoreBluetooth) hardware integration, GATT service discovery, and zero-latency data packet parsing.
- **FaceSense (AI Facial Recognition App):** Built on-device AI vision app using Core ML for automated identity verification on hardware-constrained devices.

PROFESSIONAL DEVELOPMENT

- **iOS & Swift Application Development** – Advanced Architecture, GraphQL/REST Integrations & Performance Optimization
- **Agile & Software Engineering Best Practices** – System Design, Technical Leadership & CI/CD Pipeline Automation
- **AI-Assisted Engineering Systems** – Agentic Workflows, MCP Server Integration & Context Engineering

EDUCATION

Bachelor of Technology (B.Tech) in Computer Engineering

2018 – 2022

Parul University | Vadodara, India
